

2017 Public Training Options

Electrolyte Modeling Basics

AQSim is OLI's lead training instructor in classes at OLI's office, at regional locations, and via web. The primary class offered is a 2-day workshop, Electrolyte Modeling Basics class using OLI Studio: Stream Analyzer. This class is intended for beginners.

AT OLI	NJ USA OLI's office in Cedar Knolls, New Jersey, USA	8-9 December 2016	\$1,100 USD for the public, tuition waived for clients coming to NJ USA
		6-7 June 2017 Additional classes added upon request	
REGIONAL TRAININGS	TX USA Houston	3Q 2017	\$650 USD / participant (\$750 USD/ within 2 weeks of start date)
	CANADA Calgary, Alberta	16 - 17 May 2017	
	EU Amsterdam	16-17 February 2017	

Electrolyte Modeling Basics: Short Course

This is the first day syllabus of the 2-day Electrolyte Modeling Basics class, offered as two, 3.5 hour interactive and instructor-led web sessions. This training is proven to be effective, convenient, and economical.

PUBLIC WEB CLASSES	Via web (note date changes)	6+8 February 2017 12+14 June 2017 3Q 2017	\$450 USD / web seat several participants may join from 1 seat
---------------------------	-----------------------------	---	--

Corrosion Simulation

This specialty, 2-day class is co-taught by AJ Gerbino, PhD and Andre Anderko, PhD, OLI's Managing Director and CTO, and author of OLI's corrosion simulation technology. Day 1 introduces OLI's participants to the OLI model and electrolyte chemistry basics. Day 2 is an exploration of OLI's corrosion simulation facilities, both theory and application. *Class has not yet been scheduled (please let us know of your interest).*

OLI Upstream: Chemistry in Brine Production

AQSim's flagship training for upstream production situations, taught by AJ Gerbino, PhD, an upstream simulation consultant and author of the course. Selected topics of this class are offered in our 2-day public classes or a 2- to 4-day custom class onsite at your company.

Chemistry in Brine Production

REGIONAL TRAININGS	UK Aberdeen (1 day)	13 February 2017	\$400 USD for 1 day \$650 USD for 2 days no training credits
	TX USA Houston	24-25 April 2017	(\$450/ \$750 USD/ within 2 weeks of start date)

Studio ScaleChem Basics

OLI's premier product ScaleChem Standard just got better, by moving into the OLI Studio line of products. This 1-day training (taught in two, 3-hour sessions via web) is designed to teach the basics of upstream mineral scale prediction.

PUBLIC WEB CLASSES	Via web	21+23 February 2017 19+21 June 2017 3Q 2017	\$450 USD / web seat no training credits
--------------------	---------	---	--

OLI Flowsheet: ESP

OLI's newest product, designed for electrolytes when electrolytes are primary in your flowsheet. This 1-day training introduces what to look for in multiple units, multi-stage and controller/recycle blocks typical of electrolyte flowsheet simulation.

Regional	Aberdeen, UK	14 February 2017	\$400 USD no training credits
----------	--------------	------------------	---

OLI Simulations for Refining

A new 1-day class, syllabus is in development in conjunction a few OLI Flowsheet: ESP

Regional	Galveston, TX	30 January 2017	\$400 USD no training credits
----------	---------------	-----------------	---

MSE Regression

This 3-day class in OLI internals and methods for data regression is taught by Margaret Lencka, PhD who is the Director of Thermophysical Modeling at OLI. Participants bring particular chemistries of interest to this class, for instruction on how to create parameters for OLI's electrolyte thermodynamic framework.

AT OLI (not available via web)	NJ USA OLI's office in Cedar Knolls	TBA	\$1,650 USD / participant
-----------------------------------	--	-----	---------------------------
